

ProPak Asia: Impactful Meaning for Sustainable Future

Running an exhibition "ProPak Asia" gives us lots of opportunities to improve our impacts environmentally, socially and economically in our region. We want to make our event more responsible and play a role in helping our markets improve its own sustainability through connecting people with the networks and knowledge they want to help solve the big challenges in our sector.

We do this not only because our partners & attendees tell us that they care that our events are run in a responsible manner, but because it is the right thing to do for our customers, colleagues, and the communities we serve.

Do you know?

Sustainable Event

ProPak Asia is considered a **sustainable event**, according to Thailand Sustainable Event Management Standard (TSEMS).

As part of our commitment to reducing our event carbon impact, and our journey to Net Zero we are excited to announce that we have purchased **renewable electricity for over 90%** of our event.

Sustainability Partners: Connect the Communities

Company Name: Adekom (Asia Pacific) Limited

Booth No.: FY433

Product Name: ADEKOM KSP series is specially designed for PET bottling application to meet with market ever rising requirements of high efficiency and energy saving. This combination compressor organically combines oil-free screw compressor technology and oil-free piston booster technology to achieve a stable and reliable, low noise level, low energy consumption, small footprint high pressure air system.

Fully automatic control by PLC with remote control function, realizing equipment operation status any time on site, via mobile APP, or computer software. After training, operators can complete daily operation and maintenance.
