

ProPak Asia: Impactful Meaning for Sustainable Future

Running an exhibition "ProPak Asia" gives us lots of opportunities to improve our impacts environmentally, socially and economically in our region. We want to make our event more responsible and play a role in helping our markets improve its own sustainability through connecting people with the networks and knowledge they want to help solve the big challenges in our sector.

We do this not only because our partners & attendees tell us that they care that our events are run in a responsible manner, but because it is the right thing to do for our customers, colleagues, and the communities we serve.

Do you know?

ProPak Asia is considered a sustainable event, according to Thailand Sustainable Event Management Standard (TSEMS).

Inspiring Sustainable Development

Running an Environmentally Responsible Event

Running a Socially Responsible Event

As part of our commitment to reducing our event carbon impact, and our journey to Net Zero we are excited to announce that we have purchased renewable electricity for over 90% of our event.

Sustainability Partners: Connect the Communities

Company Name: LANG LASER-System GmbH

Booth No.: FY354

Product Name: LANG LASER presents cutting-edge technology developed specifically for the flexible packaging industry. These systems offer a solution to the challenges posed by the industry's shift towards sustainability, especially when using mono films. LANG's LASER systems enable precise processing of these films, ensuring accurate results while maintaining high web speeds. These are the requirements to enable packaging functionality such as scribing for easy bag opening, microperforation for venting or macroperforation for mono or bio-based films.

Overall, LANG LASER systems are the ideal solution for manufacturers who want to take advantage of mono films without compromising performance and versatility.
