

ProPak Asia: Impactful Meaning for Sustainable Future

Running an exhibition "ProPak Asia" gives us lots of opportunities to improve our impacts environmentally, socially and economically in our region. We want to make our event more responsible and play a role in helping our markets improve its own sustainability through connecting people with the networks and knowledge they want to help solve the big challenges in our sector.

We do this not only because our partners & attendees tell us that they care that our events are run in a responsible manner, but because it is the right thing to do for our customers, colleagues, and the communities we serve.

ProPak Asia is considered a sustainable event, according to Thailand Sustainable Event Management Standard (TSEMS).

Inspiring Sustainable Development

Running an Environmentally Responsible Event

Running a Socially Responsible Event

As part of our commitment to reducing our event carbon impact, and our journey to Net Zero we are excited to announce that we have purchased renewable electricity for over 90% of our event.

Sustainability Partners: Connect the Communities

Company Name: PROMEC Srl

Booth No.: AE52

Product Name: Sustainable development is becoming an increasingly important key concept. The path towards achieving sustainability today is a social as well as an environmental and economic challenge.

Although companies must, of necessity, continue to pursue their industrial dynamics, they mustn't forget that the processes of change, the exploitation of resources, investment plans and technological guidelines must be increasingly more in harmony with the environment in which we live, already so spoiled.

It is with this in mind that, when we design and build our machines, we take all conceivable courses of action to guarantee efficiency and reliability with the lowest environmental impact.
